TECH23 2016 - COMPANIES ANNOUNCED

SYDNEY: The 23 young, innovative technology companies who will be presenting at Tech23 2016 in Sydney on Tuesday 11th October, 2016, have been announced!

Spanning big data to medtech; artificial intelligence to battery technology; many of the Tech23 in 2016 have the potential to tackle some of our biggest problems.

The eighth annual Tech23 2016 is a national celebration of Australian innovation, with founders hailing from all over the country and boasting connections with Australia's leading R&D organisations. The 23 young tech companies will present for 5 minutes to 400+ potential customers, partners and investors. They stand to win a host of incredible prizes including valuable meetings with influential people and lucrative cash awards.

“Over the years the companies participating in Tech23 have really benefited from those that they meet. It is national in focus - and potentially global in impact,”

– RACHEL SLATTERY
Director of SlatteryIT, manager of the annual event

“Over the years the companies participating in Tech23 have really benefited from those that they meet. It is national in focus - and potentially global in impact,” said Rachel Slattery, Director of SlatteryIT, manager of the annual event.

Attendees of Tech23 will be able to meet and chat to the people driving the entrepreneurial and commercialisation initiatives of our R&D organisations on 'Innovation Island' during the breaks and lunch. R&D organisations involved include: CSIRO, Curtin University, Data61, University of Technology, University of Sydney and the University of New South Wales.

Australian industry leaders Glenys Beauchamp; Angela Clark; Larry Marshall; Jane Martino; Cyan Ta'eed; Adrian Turner and Richard White are among the many Industry Leaders who will question and give advice to the 23 companies on the day.
